ABOUT ME

A Computer Science graduate with experience in web and mobile development and a strong desire to grow in the technology industry. Open to opportunities across data analytics, AI, IT support, UI/UX design, quality assurance, software development, and other technology-driven roles, with a passion for continuous learning and problem-solving.

EDUCATION

Cavite State University – Imus Campus
Bachelor of Science in Computer Science
Cum Laude, 2026

Imus City, Cavite
September 2022 - September 2026

Relevant Coursework: *Data Structures and Algorithms | Object-Oriented Programming | Experimental Statistics | Information Management | Advanced Database Management | Software Engineering | Operating Systems | Networks and Communication | Human-Computer Interaction | Intelligent Systems | Information Assurance and Security | Application Development and Emerging Technologies | Computer Graphics and Visual Computing | Numerical and Symbolic Computation | Automata Theory and Formal Languages*

EXPERIENCE

St. Dominic College of Asia, Inc.
Web Development Engineer Intern

Bacoor City, Cavite
July 2025 - September 2025

- Contributed to the development and improvement of the Parent Portal for St. Dominic College of Asia using PHP, CodeIgniter 3, Bootstrap, JavaScript, and MySQL.
- Contributed to both frontend and backend development, implementing features, database-connected functionality, and responsive interfaces while troubleshooting and debugging application issues.
- Collaborated with the MIS team in testing, documentation, version control, and day-to-day development workflows using Git, GitHub, Git Bash, XAMPP, and HeidiSQL.

PROJECTS

GlucoMate: A Mobile Blood Glucose Monitoring App with Glucometer Reading via OCR and AI-Chatbot Assistance for Individuals with Diabetes

Thesis Project | 2026 | *Flutter, Dart, Firebase Firestore, SQLite, Google Cloud Vision, Azure Bot Framework*

- A mobile application designed to support blood glucose monitoring through OCR-based glucometer scanning, blood glucose logging, health-record management, data visualization, and AI-chatbot assistance.
- Served as Project & Thesis Leader and Full-Stack Developer, responsible for UI development, health-record database structure, API integration and management through Google Cloud, and development of the OCR-based glucometer scanning feature.

Symbolic Derivative Generator Using Basic Differentiation Rules

Academic Project | 2026 | *Python, SymPy, CustomTkinter*

- A desktop application that generates symbolic derivatives of mathematical expressions using basic differentiation rules through an interactive graphical user interface.
- Contributed as Frontend Developer and Backend Support, developing the CustomTkinter interface and assisting with the application's symbolic computation and processing using Python and SymPy.

Nubi: A Web-Based Real-Time Weather Forecasting Application with Gemini-Powered Chatbot

Academic Project | 2026 | *HTML, CSS, Bootstrap, Python, CodeIgniter 3, Open-Meteo API, Gemini API, AWS*

- A web-based weather forecasting application that provides real-time weather information through an interactive chatbot, featuring location-based weather updates, hourly and 10-day forecasts, UV index, air quality, “feels like” temperature, weather notifications, and contextual weather recommendations.

- Contributed to the project by designing the UI/UX, developing the responsive frontend, and connecting the frontend chatbot interface to the backend code and Gemini API to enable user interaction and AI-generated weather responses.

Parent Portal for St. Dominic College of Asia, Inc.

Internship Project | 2025 | *PHP, CodeIgniter 3, MySQL, Bootstrap, JavaScript*

- A web-based portal developed for parents of students across Higher Education, Senior High School, and Basic Education at St. Dominic College of Asia, providing access to academic information, updates, and relevant student records.
- Contributed to frontend and backend development, implementing and enhancing system features, database-connected functionality, responsive interfaces, and user-facing components while performing testing and debugging in collaboration with the MIS team.

My Sugar Journal: A Blood Sugar Logging System

Internship Project | 2025 | *PHP, CodeIgniter 3, MySQL, Bootstrap, JavaScript*

- A web-based blood sugar logging system developed to demonstrate CRUD functionality, allowing users to record and manage blood glucose readings while viewing glucose trends and related information.
- Developed the system as an assigned trainee activity, implementing CRUD functionality along with features such as glucose trend visualization, PDF export, profile management, and database-connected record handling.

Captured by V

Personal Project | 2025 | *React.js, JSX, CSS*

- An interactive and responsive photobooth web application that allows users to select photostrip layouts, customize frame colors, preview captures, add branding and timestamps, and download high-quality photostrips.
- Developed the project independently from concept to completion, handling the UI/UX design, React frontend development, interactive functionality, layout generation, and photostrip downloading.

SKILLS

- **Programming Languages:** PHP, JavaScript, Dart, Python, C#, Java, SQL
- **Web Technologies:** HTML, CSS
- **Frameworks & Libraries:** Flutter, CodeIgniter 3, Bootstrap, React.js, CustomTkinter, SymPy, Chart.js
- **Databases & Cloud:** MySQL, SQLite, Firebase Firestore, Google Cloud
- **APIs & AI:** Google Cloud Vision, Azure Bot Framework, Google Cloud Secret Manager, API Integration, AI-Assisted Development
- **Productivity & Tools:** Microsoft Office, Google Workspace, PowerBI, Git, GitHub, Git Bash, XAMPP, HeidiSQL
- **UI/UX & Design:** Figma, Canva, Adobe Photoshop, Inkscape
- **Other Skills:** Data Analytics Fundamentals, Statistical Analysis, Data Visualization, Software Testing, Debugging, Database Management, Technical Documentation, UI/UX Design, Graphic Design
- **Soft Skills:** Problem Solving, Attention to Detail, Adaptability, Dependability, Collaboration, Leadership, Willingness to Learn

PROFESSIONAL DEVELOPMENT

- **Introduction to Power BI** – DataCamp, 2026
- **Introduction to SQL** – DataCamp, 2026
- **Joining Data in SQL** – DataCamp, 2026
- **Microsoft Artificial Intelligence Course: Azure AI Fundamentals** – TESDA Online Program, 2026
